Final Program

20th IEEE/ACIS International Summer Virtual Conference on Computer and Information Science (ICIS 2021 Summer)

June 23-24, 2021
Shanghai Development Center of Computer Software Technology
Shanghai
http://acisinternational.org/conferences/icis-2021/
Conference Organizing Committee Members

General Chair
Roger Y. Lee Central Michigan University, USA

Conference Co-Chairs
Huaikou MIAO Shanghai University, China
Lizhi CAI Shanghai Development Center of Computer Software Technology, China

Program Chair
Jiayu GONG Shanghai Development Center of Computer Software Technology, China

Registration Chair
Yun HU Shanghai Development Center of Computer Software Technology, China

Local Arrangement Chair
Yin SHEN Shanghai Development Center of Computer Software Technology, China

Publicity Co-Chairs:
Jianxin GE Hebei Software Testing Center, China
Liping LI Shanghai Polytechnic University, China
Keshou WU Xiamen University of Technology, China

Finance Chairs
Roger Y. Lee Central Michigan University, USA
Yun HU Shanghai Development Center of Computer Software Technology, China

Keynote 1

Self-Replay Augmented Record and Replay for Android

Zijiang Yang Ph. D
Founder of GuardStrike Inc.
Professor, Western Michigan University, USA

yang@guardstrike.com

Abstract

Record-and-replay tools are indispensable for quality assurance of mobile applications. In this talk, we present a record-and-replay tool targeting a wide adoption. Specifically, a dynamic instrumentation technique is used to accommodate rich sources of inputs in the application layer satisfying various constraints requested from industry. A self-replay mechanism is proposed to record more information of user inputs for accurate replaying without degrading user experience. In addition, an adaptive replay method is designed to enable replaying events on different devices with diverse screen sizes and OS versions. Through an evaluation on 53 highly popular industrial Android applications and 265 common usage scenarios, we demonstrate the effectiveness in recording and replaying rich sources of inputs on the same or different devices.

Biography

Zijiang Yang received his PhD from the Univ. of Pennsylvania, M.S. from Rice Univ. and B.S. from the University of Science and Technology of China, all in computer science. He is the founder of GuardStrike Inc and professor at Xi'an Jiaotong University. Before founding GuardStrike he was a professor at Western Michigan University. He is the chair of IEEE Technical Committee on Electric and Autonomous Driving, general chair of the 2019 IEEE International Conference on Software Testing, Verification and Validation, program committee chair of the 2018 International Conference on Reliable Software Engineering. Dr. Yang received ACM SIGSOFT outstanding paper award, ACM TODAES best Journal Paper Award. As of February 2021 he published 98 papers and a co-inventor of 10 US patents.
Keynote 2

Heterogeneous Computing: Tackling Various Computational Operations with Differential Software and Hardware

Hai Jiang, Ph.D.

Professor, Department of Computer Science

Arkansas State University, USA

hjiang@astate.edu

Abstract

In modern computers, all computational operations are specified in programs and executed in corresponding pipelines in unified Central Processing Units (CPUs). To improve system efficiency and speed up application execution, heterogeneous computing decentralizes the processing process and utilizes different software and hardware components on various computational operations. Other than CPU, many autonomous co-processors, accelerators, device drives, and special circuits have been developed to address domain specific tasks. In recent years, DSPs (Digital Signal Processors), GPUs (Graphics Processing Units), APUs (Accelerated Processing Units), TPUs (Tensor Processing Units), FPGAs (Field-Programmable Gate Array) and ASICs (Application-Specific Integrated Circuits) have demonstrated their effectiveness in domain specific processing. Both data and computations are arranged to achieve “Near Resource Computing” for efficient and accelerated application execution. This talk focuses on the architectural and programming trends in Heterogeneous Computing.

Biography

Dr. Hai Jiang is a professor in the Department of Computer Science at Arkansas State University, USA. He received his Ph.D. degrees from Wayne State University, USA. His research interests include Parallel & Distributed Systems, Cloud Computing, Big Data, High Performance Computing & Communication, Cryptography, and Computer & Network Security. Dr. Jiang is a professional member of ACM and IEEE computer society. He has published four books and more than 100 papers in refereed journals, conference proceedings and multiple book chapters. He has been involved in more than 100 conferences and workshops as a program/workshop chair or as a program committee member. He serves as an editor or guest editor for multiple international journals such as IEEE Transactions on Network Science and Engineering. He has
been chairing IEEE Technical Committee on Scalable Computing (TCSC) PhD Dissertation Award Selection Committee since 2017.
Program in Detail

Thursday, June 23, 2021

9:30 - 9:50 – Opening Ceremony
Virtual

9:50 - 10:50 – Keynote 1
Virtual

10:50 - 11:00 –Break

11:00 - 12:00 – Keynote 2
Virtual

12:00 - 13:30 – Lunch

13:30 - 15:10 – Regular Session(5)
Chair: Bin Zhang(Shanghai University)
Virtual

Situational Awareness Platform Based on Multi-source Vulnerability Fusion
Chao Wang, MinGang Chen and JiaYu Gong

Evaluation method of Enterprise Cybersecurity
Meng Zhang, Yue Zhou, Che Li, Shuang Li, Jianhua Wu and Chao Yan

Mobile App Personal Information Security Detection and Analysis
Shuang Li, Meng Zhang, Che Li, Yue Zhou, Kanghui Wang and Yaru Deng

Automatic Music Mashup Creation Method by Similarity of Features
Kyosuke Miyamura, Ryotaro Okada and Takafumi Nakanishi

Image Steganography using GANs
Ketan Ramaneti, Pranavi Kakani and Chaitanya Krishna Mullapudi

13:30 - 15:10 – SMTA 2021 Workshop (5)
Chair: Jiefeng Liu & Xin Zhang(Communication University of China)
Virtual

Marketing Logistics Cost Optimization and Application Research in Smart Living
Xianhong Xu

Classifying subway passengers based on mobile network data analysis
Xingrui Lou, Ming Yan

Transformer-IC : The Solution to Information Loss
Wenqian Shang, Jiazhao Chai

Acoustics Measurement and Simulation Analysis of Small Theater
Hai Ren, Yashu Zhao, Nili Bai

Construction and Application of a Tree Knowledge Graph
Xianghao Meng, Yu Yang, Hexiang Qi, Dongmei Li, Jiayuan Zhang, Yu Lu, Guoliang Huang

15:10 - 15:30 –Break
15:30 - 17:10 – Regular Session (5)  
**Chair: Ketan Ramaneti (Vellore Institute of Technology)**

Application of BP Neural Network in Prediction of Ground Settlement in Shield Tunneling  
*Min Hu, Bin Zhang and Mengdong Lu*

Face depth prediction by the scene depth  
*Bo Jin, Leandro Cruz and Nuno Gonçalves*

Weather Map Prediction Using RGB Metaphorical Feature Extraction for Atmospheric Pressure Patterns  
*Takeru Hakii, Koshi Shimada, Takafumi Nakanishi, Ryotaro Okada, Keigo Matsuda, Keiko Takahashi and Ryo Onishi*

Heart Sound Segmentation Based On a Joint HSMM Method  
*Yao Zhang, Zeyu Ma, Xin Zhou, Xianhong Li, Ying Liu, Mingang Chen, Xin Sun, Xuying Wang, Jingtao Wang, Lizhi Cai and Kun Sun*

A Framework and Decision Algorithm to Determine the Best Feature Extraction Technique for Supporting Machine Learning-Based Hate Speech Detection,  
*Chun-Kit Ngan and Kashyap Bhuva.*

15:30 - 17:30 – SMTA 2021 Workshop (6)  
**Chair: Jiefeng Liu & Xin Zhang (Communication University of China)**

The Influence of Reverberation on the Perceptual Judgment of Cross-Lingual Speakers’ Timbre  
*Yali Liu, Mian Wu*

Multi-Hop Reasoning for Question Answering with Knowledge Graph  
*Jiayuan Zhang, Yifei Cai, Qian Zhang, Zehao Cao, Zhenrong Cheng, Dongmei Li, Xianghao Meng*

Optimizing convolutional neural network performance by mitigating underfitting and overfitting  
*Qiwei Li, Ming Yan*

Research on Image Classification Based on Deep Learning  
*Jiao Li, Nanchang Cheng*

A New Wolves Intelligent Optimization Algorithm  
*Yanchao Sun, Wei Chen, Yuqing Wu*

Research on the Model of Academic Status Based on Deep Learning  
*Yanchao Sun, Wei Chen, Minzheng Jia*
Thursday, June 24, 2021

9:30 - 10:50 – Regular Session (4)  
Chair: Zeyu Ma (Shanghai Development Center of Computer Software Technology)

Performance comparison test of HBase and Cassandra based on YCSB  
*Cui Xiaoxue and Chen Wenjie*

Max-Fusion of Random Ensemble Subspace Discriminant with Aggregation of MFCCs and High Scalogram Coefficients for Acoustics Classification  
*Cheng Siong Chin and Jianfang Xiao*

Accessible Programming Language for Visually Impaired Students  
*Sajeban Antonyrex and Saman Hettiarachchi*

On the Erdős-Sós conjecture for stars, paths and some of their variants  
*Antoine Bossard*

10:50 - 14:00 – Lunch  

14:00 - 15:20 – Regular Session (4)  
Chair: Meng Zhang (Shanghai Development Center of Computer Software Technology)

Analysis on the quality model of big data software  
*Xijiao Xu, Huanming He, Wei Song and Jiayu Gong*

Algorithms for a variant of the full Steiner tree problem  
*Haiyan Wang, Binchao Huang and Jianping Li*

Sustainable Energy Resources of Bangladesh: A Big Data Approach  
*Sowvik Kanti Das, H. M. Mahir Shahriyar and Mahady Hasan*

A Partitioning Algorithm Based on Exact Resolution to Solve Big Data PTSP  
*Mohamed Abdellahi Amar*
